PROJECTS

Student Attendance Management-API

[Github](#)

Node.js • Express.js • MongoDB

- Built and deployed a RESTful attendance API (Node.js + Express + MongoDB) featuring student registration, attendance logs, and summary endpoints.
- Implemented data modeling, middleware, error handling, and Postman-tested routes for production-ready API performance.

Interactive Resume Builder

[GitHub](#) — [Live Link](#)

React • Vite • Tailwind CSS

- Built an interactive Resume Builder using React with real-time preview, localStorage autosave, and PDF export; optimized for non-technical users to create resumes effortlessly.

Fraud Detection in Transactions

[Github](#)

Java • MySQL

- Developed a Java-based backend system that detects rapid repeated transactions using DSA logic and SQL-based real-time checks.
- Built two versions (SQL + DSA-only) with custom data models, time-window validation, and production-ready backend structure.

ACHIEVEMENTS

- Achieved a highest CodeChef rating of **1428**; secured **Global Rank 282** in Starters 195.
- Awarded an **A+ grade** in the NCC ‘B’ Certificate Examination.
- Led the design team and contributed to branding for college club events.
