PROJECTS

SafeMarg – Accident Zone Visualization Platform

[GitHub](#) — [Live Link](#)

React • Tailwind CSS • Node.js • Express.js • MongoDB

- Visualized [1000+ accident-prone locations] using interactive heatmaps with approx. [80-90%] location accuracy.
- Developed responsive frontend and REST APIs enabling real-time incident reporting and CRUD operations.
- Deployed scalable client-server architecture using Vercel and Render, strengthening full stack development skills.

Interactive Resume Builder

[GitHub](#) — [Live Link](#)

React • Vite • Tailwind CSS

- Built an interactive Resume Builder using React with real-time preview, localStorage autosave, and PDF export; optimized for non-technical users to create resumes effortlessly.

Student Attendance Management-API

[Github](#)

Node.js • Express.js • MongoDB

- Built and deployed a RESTful attendance API (Node.js + Express + MongoDB) featuring student registration, attendance logs, and summary endpoints.
- Implemented data modeling, middleware, error handling, and Postman-tested routes for production-ready API performance.

ACHIEVEMENTS

- Achieved a highest CodeChef rating of **1428**; secured **Global Rank 282** in Starters 195.
- Awarded an **A+ grade** in the NCC 'B' Certificate Examination.
- Led the design team and contributed to branding for college club events.
